

Ellicott's work."

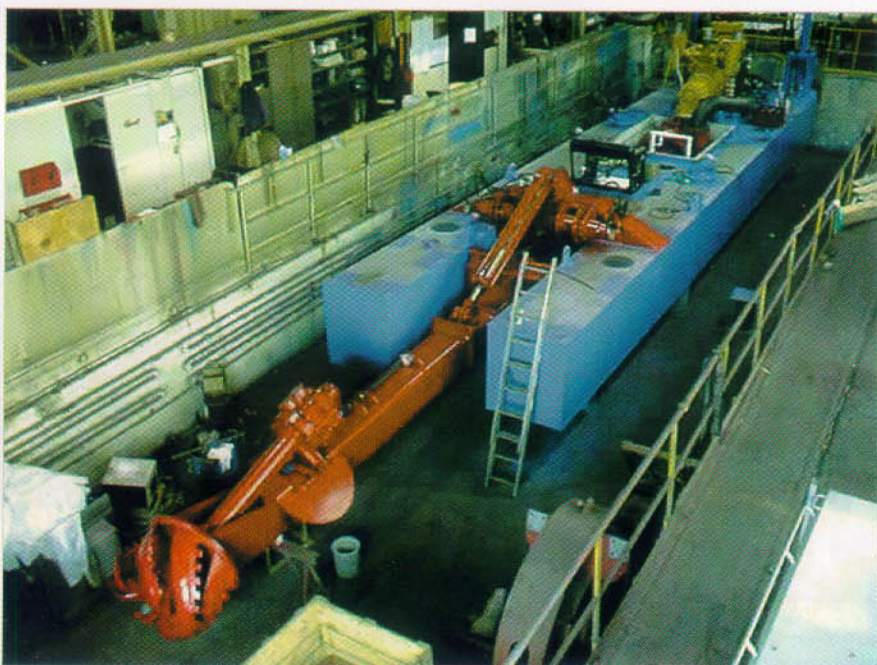

Ellicott has also just delivered large components for dredge locks for the **Panama Canal Commission** with whom Ellicott has done business for almost 100 years.

In June Ellicott completed a multiple dredge order of *MC-2000* auger (CS/A) dredges under its *Mud Cat*TM line for the **State of Veracruz, Mexico**.

The dredges are being used for river cleanup around the State. Ellicott's latest delivery is of a *Series 670* 12-in. dredge for a Latin American customer to expand the operations of a shrimp farm. The dredge is shown here under construction at Ellicott's plant in the photograph (R).

Other recent deliveries of note include a large parts order for the 24-in. [609 mm] bucketwheel dredge *Barakat* owned by the **Suez Canal Authority** and a bucketwheel (BWS) dredge for **Cynergy**, a power plant operator.

Ellicott also has a number of new orders for standard

Series 670 under construction

dredges for sand and gravel mining both for sale and as short term leases. **Don McCaig**, VP of sales, said he was very pleased with the level of enquiries and encouraged by the state of the dredge market, both domestically and internationally. ○
